 Will Relocate

Current Position

Martin Williams Advertising	**Development Manager**

Resume

As Development Manager, and Quantum Architect of the Martin Williams Advertising [I] Group I have been a key team member in the technical arena, as well as an asset to the creative department. I have managed teams from 1 to 5 developers. I have been involved with bringing Fusebox & eXtreme programming to our teams. I have also been the key point of ASP, and ColdFusion knowledge. When someone is stumped I am the go-to guy. The short list of other clients I've worked on at Martin Williams include: Target Corporation, Marvin Windows and Doors, Scotts Comapany (Miracle-Gro, Ortho, Roundup, etc.), Polaris Industries, and Victory Motorcycles

As an independent contractor I have worked for many Minneapolis firms including Fallon, Y|M, and Kirkwald Design Group. I have also contracted with Zuma Digital/Tapehaus and Gallium Digital in New York.

I also find time to tinker with my own personal endeavors - including information design studies, and pixelcannon which is predictable and organic aural visual Synaesthesia.
